| OB/Neonate/Pediatrics | 0.44 |
| Pharmacology | 1.15 |
| Preparatory | 1.35 |
| Trauma | 0.76 |
| TOTAL | 5.8 |

Certification – As a New York State EMS Certified Instructor/Coordinator, I have viewed, listened to, or read the all of the on-line update education components for the 2017 Collaborative New York Protocols, and have assigned each component to its most appropriate Continuing Medical Education (CME) Recertification Program core content category/categories for each of the certification levels listed, along with the actual running time or approximate completion time of each listed category within each component. I have also provided the subtotal of time in each CME core content category for each of the certification levels listed. I attest to the appropriateness of all content, as listed, for the purposes of the CME Recertification Program, from a practice perspective, awareness perspective (for that content applying primarily or solely to providers of a higher certification level), or both. The total CME hours listed should be credited only to those who have completed the on-line protocol update content in its entirety.

Raymond M. Serowik, NRP NYS EMS CIC #3887
