

Understanding Brain Injury

Trainer: Margo B. Singer

Program Coordinator, Brain Injury Association of NYS

Wednesday, November 7, 2018

6:00 - 8:00 pm

Broome County Public Safety Facility

Lt. VanWinkle Drive

Binghamton, NY

CME 2 hours

Learning Objectives:

1. Attendees will learn the causes of Acquired and Traumatic Brain Injury
2. Attendees will understand what happens immediately after a brain injury, and how to use the Glasgow Coma Scale
3. Attendees will understand the physical, cognitive/Executive functioning, emotional and psychosocial challenges after brain injury that can affect how they work with a person with brain injury
4. Attendees will learn strategies to assist with special populations who have a brain injury (such as children, domestic violence victims)
5. Attendees will become familiar with the different systems of care available in the rehabilitation continuum
6. Attendees will learn about resources and supports available from state and local organizations in their community

Every nine seconds a person sustains a brain injury in the U.S., which can result in a lifelong disability, especially if not properly treated. In New York State, more than 500 people sustain a brain injury each day. Annually, traumatic brain injuries result in more than 2,000 deaths, 19,000 hospitalizations, and over 112,000 emergency department visits among NYS residents. This presentation will discuss what is brain injury, including incidence, prevalence and epidemiology; how brain injury can occur and common challenges after brain injury; differences between children and adults; systems of care available in the rehabilitation continuum; as well as resources and supports available from the Brain Injury Association of NY and other state/local organizations. Resource Toolkits will be provided.
